

Charlotte-Mecklenburg Middle School Students

The Youth Risk Behavior Survey (YRBS), produced by the Centers for Disease Control and conducted every two years, assesses health risk behaviors that contribute to some of the leading causes of morbidity and mortality in youth.

In 2009, the YRBS was administered in 33 public middle schools in Charlotte-Mecklenburg County. Among the 2,791 middle school students participating:

- 49% were female
- 51% were male
- 44% were Black, non Hispanic
- 33% were White, non Hispanic
- 19% were Hispanic/ Latino
- 4% were of Other Races

2009 Data Highlights for the Charlotte Mecklenburg– Middle School YRBS

The survey content of the Middle and High School YRBS are similar with the exception that questions used in the middle school survey are worded differently to reflect appropriate reading levels of students. Participants in the survey completed a self-administered, anonymous questionnaire. Local parental permission procedures were followed before survey administration.

Organization of the Data

Survey data is divided into 9 categories:

- Personal Safety
- Bullying and Harassment
- Psychological Health
- Substance Abuse
- Sexual Behavior
- Weight Management and Nutrition
- Physical Activity
- Selected Health Issues
- Assets for Healthy Youth Development

Positive Trends

- Reports of never or rarely wearing a seat belt declined from the previous year.
- 65% of students have at least one teacher or other adult in school they could talk to if they had a problem.

Areas for Improvement

- The percentage of students reporting being bullied on school property increased from 26% in 2007 to 39% in 2009.
- One out of every five students reported seriously thinking about killing themselves.
- A third of students reported ever having had a drink of alcohol other than a few sips.

Charlotte-Mecklenburg Middle School Students

The first local YRBS was administered in 2005 but only included Charlotte-Mecklenburg high school students. In the spring of 2007 the YRBS was administered to both middle and high school students. The results of the 2009 middle school survey show some encouraging findings, but also point to behavior practices among middle school youth that could result in serious health consequences.

Personal Safety

	2007	2009
Among students who rode a bicycle, never or rarely wore a bicycle helmet in the past year	69%	74%
Ever rode with a driver in a car or other vehicle who had been drinking alcohol	27%	28%
