Introduction

CITY WITHIN A CITY NEIGHBORHOOD ASSESSMENT

INTRODUCTION

Charlotte is among the fastest growing cities in the South. It is now the 35th largest city in the United States. Charlotte's prosperity has been fueled principally by suburban growth and development in Uptown. Nestled between the City's majestic uptown skyline and bustling suburbs is an area called City Within A City. This area consists of some of Charlotte's oldest residential and business areas.

The Neighborhood Assessment report profiles conditions of seventy-three residential neighborhoods within City Within A City. The report identifies general service delivery needs, categorizes the neighborhoods based on their overall health and stability, and profiles each neighborhood's physical and socioeconomic characteristics.

PURPOSE

In addition to being a valuable source of information on City Within A City neighborhoods, the Neighborhood Assessment report, will also be used to:

1) Help identify neighborhoods to target for improvements.

To accomplish the goals established for the City Within A City initiative, neighborhoods are being targeted for comprehensive improvements. To date, four neighborhoods (Belmont/Villa Heights, Seversville, Genesis Park and Reid Park) have been targeted for improvements. This report will provide needed information and a basis for selecting future targeted neighborhoods.

2) Help City/County staff, local officials, and other agencies make resource allocation and investment decisions.

The report identifies general service delivery needs in each neighborhood. As such, resources can be identified and budgeted to meet these needs.

3) Provide a benchmark to measure success and gauge changes in neighborhoods.

Most of the data in this report can be routinely updated. As neighborhoods are targeted for improvements, the data can be reassessed to determine changes and overall impacts of investments made in these neighborhoods.

SURVEY PROCESS

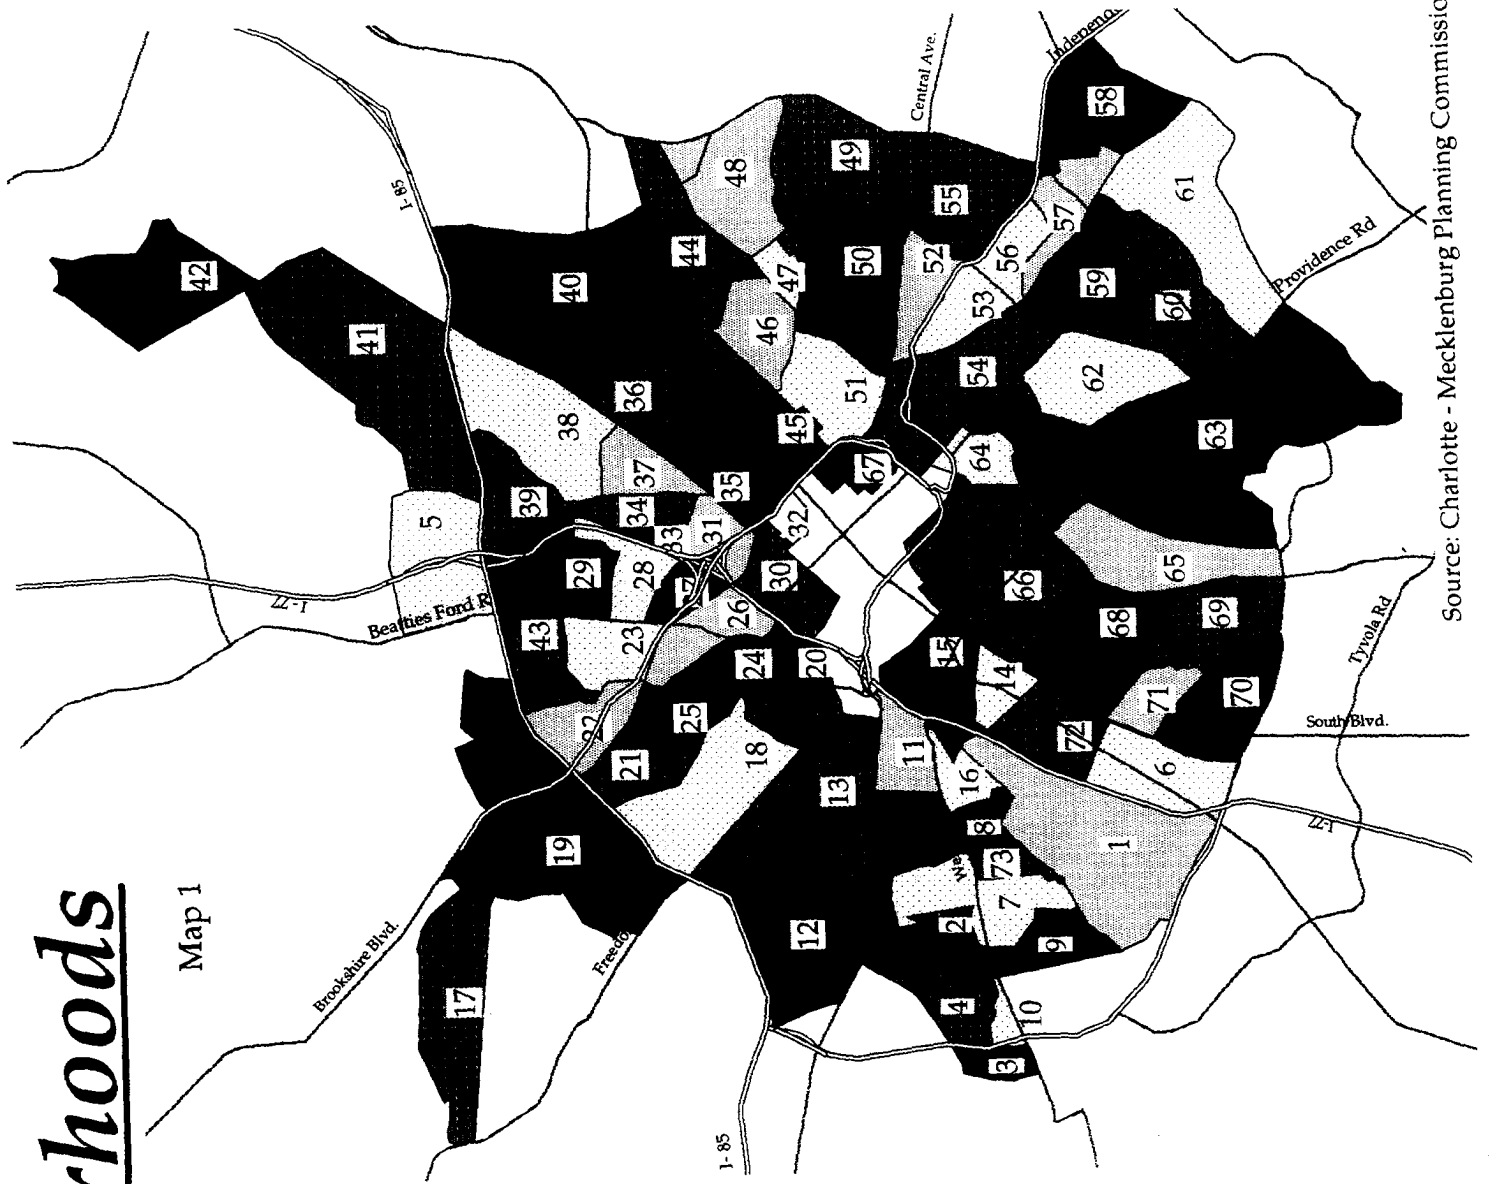

To compile the neighborhood information, a comprehensive survey was conducted by a City/County interdepartmental team led by the Charlotte-Mecklenburg Planning Commission with help from City Engineering, City Community Development, City Department of Transportation, City Neighborhood Centers, City Community Improvement, County Parks and Recreation, Charlotte-Mecklenburg Police, County Social Services, along with representatives from the Charlotte-Mecklenburg Schools and United Way.

To conduct the survey, the *City Within A City* (CWAC) area was divided into 73 neighborhoods. (See Map 1) Staff attempted to name and define the boundaries of the 73 neighborhoods consistent with how residents define their neighborhood boundaries. However, because census information was the major source of information; neighborhood boundaries followed 1990 Census block groups and individual census blocks to define general neighborhood boundaries. Consequently, some neighborhoods are larger and may represent a combination of neighborhoods. For example, the area defined as Lincoln Heights also includes the Dalebrook neighborhood.

The data was compiled from a number of sources. Generally, the socioeconomic data (i.e. population, housing, income and employment) was compiled from available 1990 Census information. Information on the physical environment was collected primarily through field surveys and/or from information submitted by various city/county departments and agencies. Finally, questionnaires were sent to neighborhood leaders to allow them the opportunity to identify their priority issues and needs. All total, 186 variables were collected on each neighborhood of which 98 are reported in this report.

Overview of CWAC

Overview Of City Within A City

According to the 1990 Census, approximately 145,663 people live in the *City Within A City* area. Its 1990 population would make it the fifth largest city in North Carolina. The 73 neighborhoods cover approximately sixty square miles.

The following lists some key social, economic, and physical characteristics of *City Within A City*:

The area is racially balanced.

Within this area, 51% of the population is black and 47% are white while 2% are Asians, Hispanics and other minorities. A significant proportion of blacks in Charlotte live in the *CWAC* area.

One of every six families lives below poverty.

The poverty rate for families in this area is 17% which is twice the rate for families in the rest of Charlotte.

One of every seven households is headed by a single female.

Over 14% of all families in *CWAC* are headed by single females while the rate for the rest of Charlotte is 9.6%.

Majority of the neighborhoods experienced high unemployment.

In 1990, when unemployment in the rest of Charlotte was only 3.3%, twenty of the 73 *CWAC* neighborhood's unemployment rates exceeded 10%- three times higher than the rest of the City. Another 21 neighborhoods had unemployment rates between 6 and 9 percent or twice the City's rate.

Most families rent their homes.

Within this area, only 44% of the homes are owner occupied while 56% are rented. For the rest of Charlotte, 62% of the homes are owned and only 38% are rented.

Nearly one-third of the adults do not have a high school diploma.

Of the approximately 93,789 adults in the area over 25 years of age, 31% do not have a high school diploma as compared to 12% in the rest of the City.

Most of the neighborhoods have high rates of crime.

Crime occurs throughout Charlotte but the incidence of violent and drug related offenses are generally highest in the areas where there are social and other physical problems. In 1992, there were approximately 3,083 arrests classed as drug arrests by the Uniform Crime Reporting Guidelines. Of this total, approximately 2,300 or 75% were made in the *City Within A City* area. During 1992, 24 of the 73 neighborhoods had over 100 violent offenses reported. In 1992 Belmont/Piedmont Court area had 409 violent offenses and 229 drug arrests greater than any of the other neighborhoods.

Most of the neighborhoods have some type of community organization or association.

Of the 73 neighborhoods in the area, only 8 neighborhoods do not have some type of community organization registered with the Planning Commission. Formal community development corporations serve 14 of the 73 *CWAC* neighborhoods.

Majority of the neighborhoods have inadequate sidewalks, curbs & gutters, or inadequate drainage facilities.

Approximately 70% of the neighborhoods have inadequate or no storm drainage systems. In addition, 43% or 32 neighborhoods have inadequate or no sidewalks, curbs, gutters or street lights.

CWAC Neighborhood Analysis

CITY WITHIN A CITY NEIGHBORHOOD ANALYSIS

Overall statistics for the City Within A City area often underestimate the severity of problems in some neighborhoods and overshadows the positive attributes in other neighborhoods. Consequently, the assessment report isolates issues, problems, and opportunities that are distinct and unique to each of the 73 neighborhoods. Additionally, the assessment differentiates various types of neighborhoods from one another based on their relative health and stability. The neighborhoods are categorized as being *fragile, threatened, or stable*.

METHODOLOGY

To categorize the neighborhoods, 20 of the 186 neighborhood variables collected were selected as the primary means to assess or measure a neighborhood's overall health and stability. These variables were generally grouped into three categories --socioeconomic, infrastructure, and community appearance. The 20 variables are listed below:

Socioeconomic Variables:

- | | |
|---------------------------------------|--|
| 1) Families on Public Assistance | 2) Families with Incomes Below Poverty |
| 3) Poverty - Female Headed Households | 4) Married with children |
| 5) Poverty - Females with Children | 6) Employed in Blue Collar Jobs |
| 7) Employed in White Collar Jobs | 8) Unemployed |
| 9) Household With No Vehicle | 10) With high school diploma |
| 11) College Degrees | 12) Housing Values below \$50,000 |
| 13) Renter Occupied Housing | 14) Rate of Violent Crime |
| 15) Rate of Drug Arrests | |

Infrastructure Variables:

- | | |
|---|-----------------------------|
| 1) Streets With No Curb & Gutter | 2) Streets with No Sidewalk |
| 3) Drainage Rating (High, Medium & Low) | |

Community Appearance Variables:

- | | |
|------------------------------|--------------------------------|
| 1) Vacant and Overgrown Lots | 2) Number of Litter Violations |
|------------------------------|--------------------------------|

These 20 variables were subjected to a principal components analysis. This quantitative technique was used to group variables that were highly correlated and reduced the number of variables, listed above, to three major indicators of neighborhood stability. These newly created variables were **Socioeconomic, Infrastructure and Community Appearance**. These three indicators were primarily used to judge the quality and health of the neighborhoods.

After the 20 variables were reduced to the three major indicators, cluster analysis was used to group the 73 neighborhoods for each indicator based upon need. Each neighborhood received a score based upon their group rank relative to the three indicators. Since two of the indicators, infrastructure and community appearance, represented physical variables, the socioeconomic indicator was given a weight of two times the other variables. This was done to balance social and physical measures for the neighborhood. Each of the indicators were assigned a point score (3,2,1 or 0) based upon their cluster groupings which are as follows:

- | | |
|-------------------------------------|--|
| 1) Social (<i>2 Times</i>) | 3) <i>MAJOR</i>
2) <i>NEED</i>
1) <i>AVERAGE</i>
0) <i>NO NEED</i> |
| 2) Infrastructure | 3) <i>VERY POOR</i>
2) <i>POOR</i>
1) <i>AVERAGE</i>
0) <i>GOOD</i> |
| 3) Community Appearance | 3) <i>VERY POOR</i>
2) <i>POOR</i>
1) <i>AVERAGE</i>
0) <i>GOOD</i> |

The cumulative scores of the indicators were used to classify as 1) *Fragile*, 2) *Threatened*, or 3) *Stable* (See Map 2) for each neighborhood based on the following:

Fragile: Neighborhoods that scored between 6 and 10 points

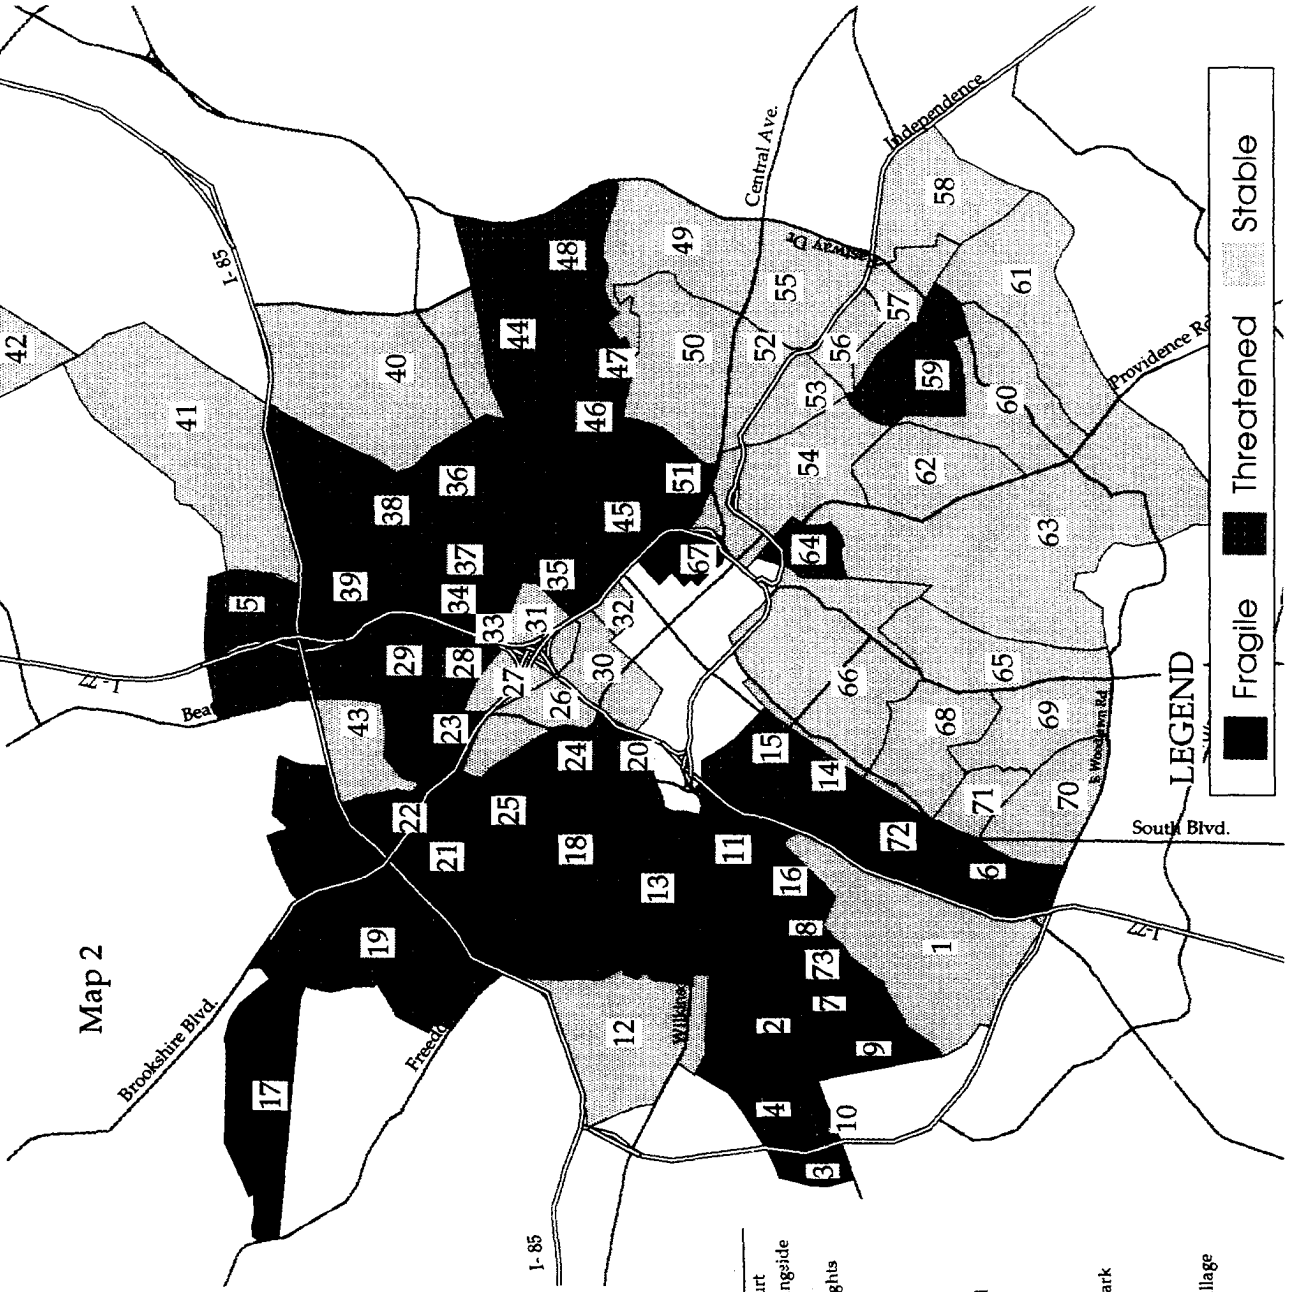

Threatened: Neighborhoods that scored between 3 and 5 points

Stable: Neighborhoods that scored between 0 and 2 points

Neighborhood Classifications

NEIGHBORHOOD CLASSIFICATIONS

The neighborhood classifications attempt to reflect the general health and well being of the neighborhoods as well as identify specific issues and problems that need to be addressed. Of the 73 *City Within A City* neighborhoods, 29% were classified as Fragile, 30% as Threatened, and 41% as Stable neighborhoods.

FRAGILE NEIGHBORHOODS

As shown on Map 3 and Table 1., twenty-one neighborhoods were identified as fragile. Generally fragile neighborhoods are those that have either high social, high physical needs or both. They also generally demonstrate some level of service delivery needs on each of the three indicators. Of the 73 neighborhoods surveyed, these neighborhoods demonstrate the greatest need for social services. Only two neighborhoods (Todd Park and Revolution Park) show average social need for this group of neighborhoods.

There were some exceptions such as the five public housing communities that did not show a need for infrastructure. Most of these communities are developed with multi-family housing and are densely populated. The multi-family housing development standards mandate that certain amenities like sidewalks, curbs and gutters be constructed.

In addition, five of the neighborhoods (Belmont, Capitol Drive, Genesis Park, Reid Park and Seversville) have been targeted by the City for improvements. Funds have been spent in these areas to build new houses, sidewalks, curbs, gutters and address drainage needs.

**Fragile Neighborhoods
Table 1.**

Id.	Neigh. Neighborhood	Social	Infra*	Comm*	Total	Category Ranking
51	Belmont	6	2	2	10	Fragile

23	Washington Heights	4	2	0	6	Fragile
39	Wilson Heights	4	1	1	6	Fragile

* - Infra means Infrastructure; Comm means Community Appearance

** - Statistics for the Pinecrest neighborhood may be overstated in terms of severity of socioeconomic problems and needs. Social characteristics were estimated and the attributes of the surrounding area makes this neighborhood appear in worse condition than it is.

Of the twenty-one fragile neighborhoods:

The majority (16) are located west and northwest of I-77 (Beatties Ford Road and West Boulevard areas)

These neighborhoods are among the highest for families headed by single females ranging from a low of 13% (Todd Park) to a high of 57% (Boulevard Homes)

The majority (15) of the neighborhoods have double digit unemployment with Wilson Heights and First Ward having rates as high as 21 and 23 percent respectively

Most of the housing in these neighborhoods are renter occupied

Fix and build homes, jobs/job training, and drug treatment were the most frequently cited services and assistance needed identified by neighborhood leaders from these neighborhoods

Recreation, drug treatment and teen pregnancy education were the most frequently cited children services listed by neighborhood leaders in these neighborhoods

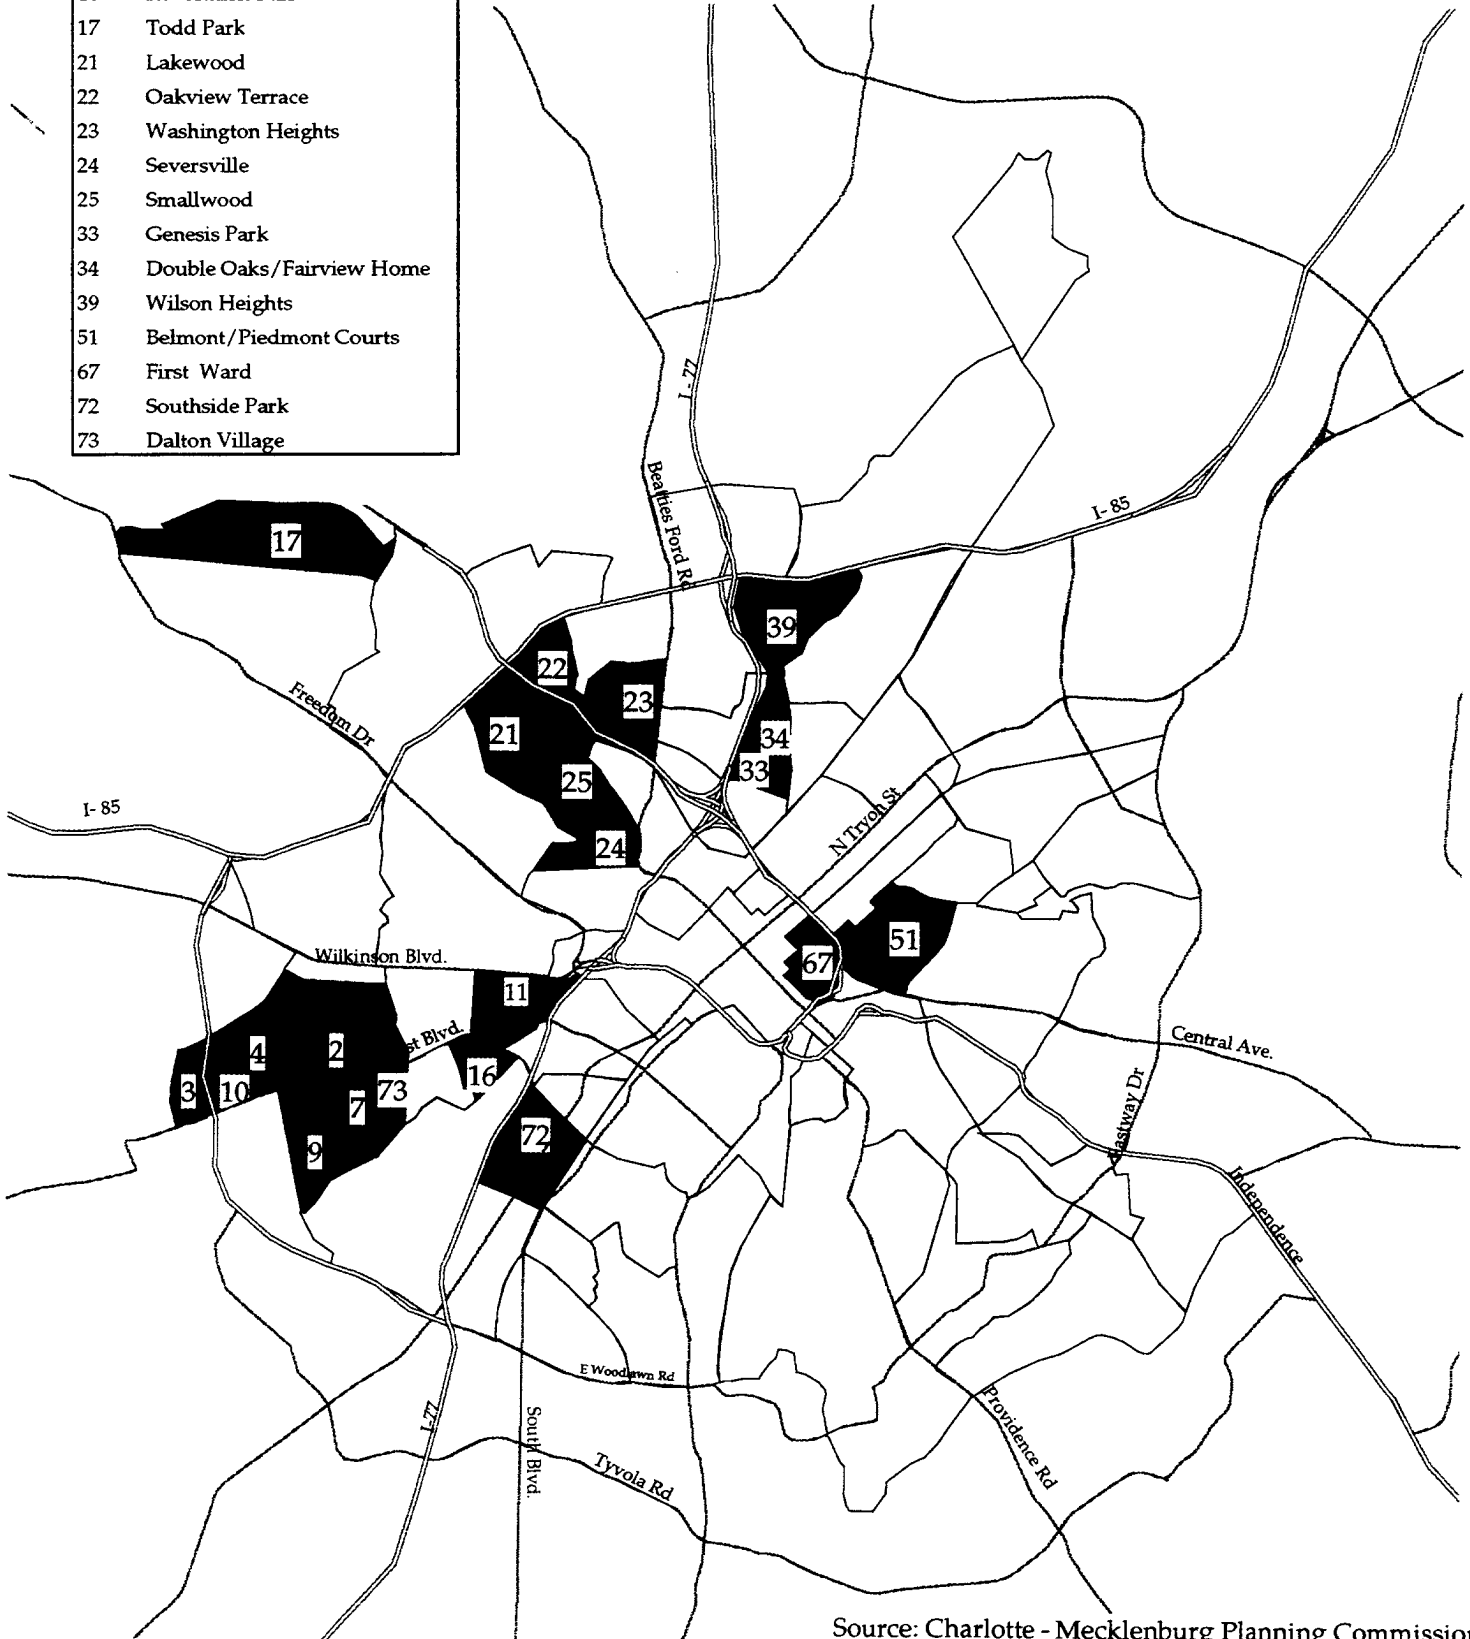

Twelve neighborhoods (Belmont, Genesis Park, Oakview Terrace, Seversville, Southside Homes, First Ward, Wilson Heights, Lakewood, Capital Drive, Ponderosa, Jackson Park and Boulevard Homes) are among the top twenty in violent crime or drug offenses

The majority of the neighborhoods 18 of 21 have an organized neighborhood association registered with the Planning Commission

THREATENED NEIGHBORHOODS:

As shown on Map 4 and Table 2., twenty-two neighborhoods are classified as threatened. The neighborhoods are scattered throughout *City Within A City*. Threatened neighborhoods are those that generally do not show a significant need for social services but show relatively high need for infrastructure. Seven neighborhoods (Brookhill, Lockwood, Optimist Park, Tryon Hills, West Boulevard, Wilmore and Grier Heights) show the highest need for social services for this category of neighborhoods. Of the seven neighborhoods, (Lockwood, Optimist Park, Wilmore and Grier Heights) have received City funds for infrastructure, housing and other improvements. Additional neighborhoods that have received funding are Cherry, Thomasboro/Hoskins and North Charlotte.

**Threatened Neighborhoods
Table 2.**

Neigh. Id.	Neighborhood	Social	Infra*	Comm*	Total	Category Ranking

6	York Road	2	1	1	4	Threatened
44	North Charlotte	2	1	0	3	Threatened

* - Infra means Infrastructure; Comm means Community Appearance

Of the twenty-two threatened neighborhoods:

The neighborhoods are scattered throughout the City Within A City area but are generally contiguous or adjacent to fragile neighborhoods

The neighborhoods rarely score high on both social and physical needs

Almost half ranked poor or very poor for infrastructure

Fifteen scored average or no need on the socioeconomic indicator

Unemployment rates are generally between 0 and 9 percent. Five neighborhoods have double digit unemployment (West Boulevard, Optimist Park, Wesley Heights, Lincoln Heights and Lockwood)

Most of the homes in these neighborhoods are renter occupied

Eighteen of the twenty-two neighborhoods have a community organization registered with the Planning Commission

Fix and build homes, jobs/job training and police were the most frequently cited services and assistance needed that were identified by neighborhood leaders from these neighborhoods

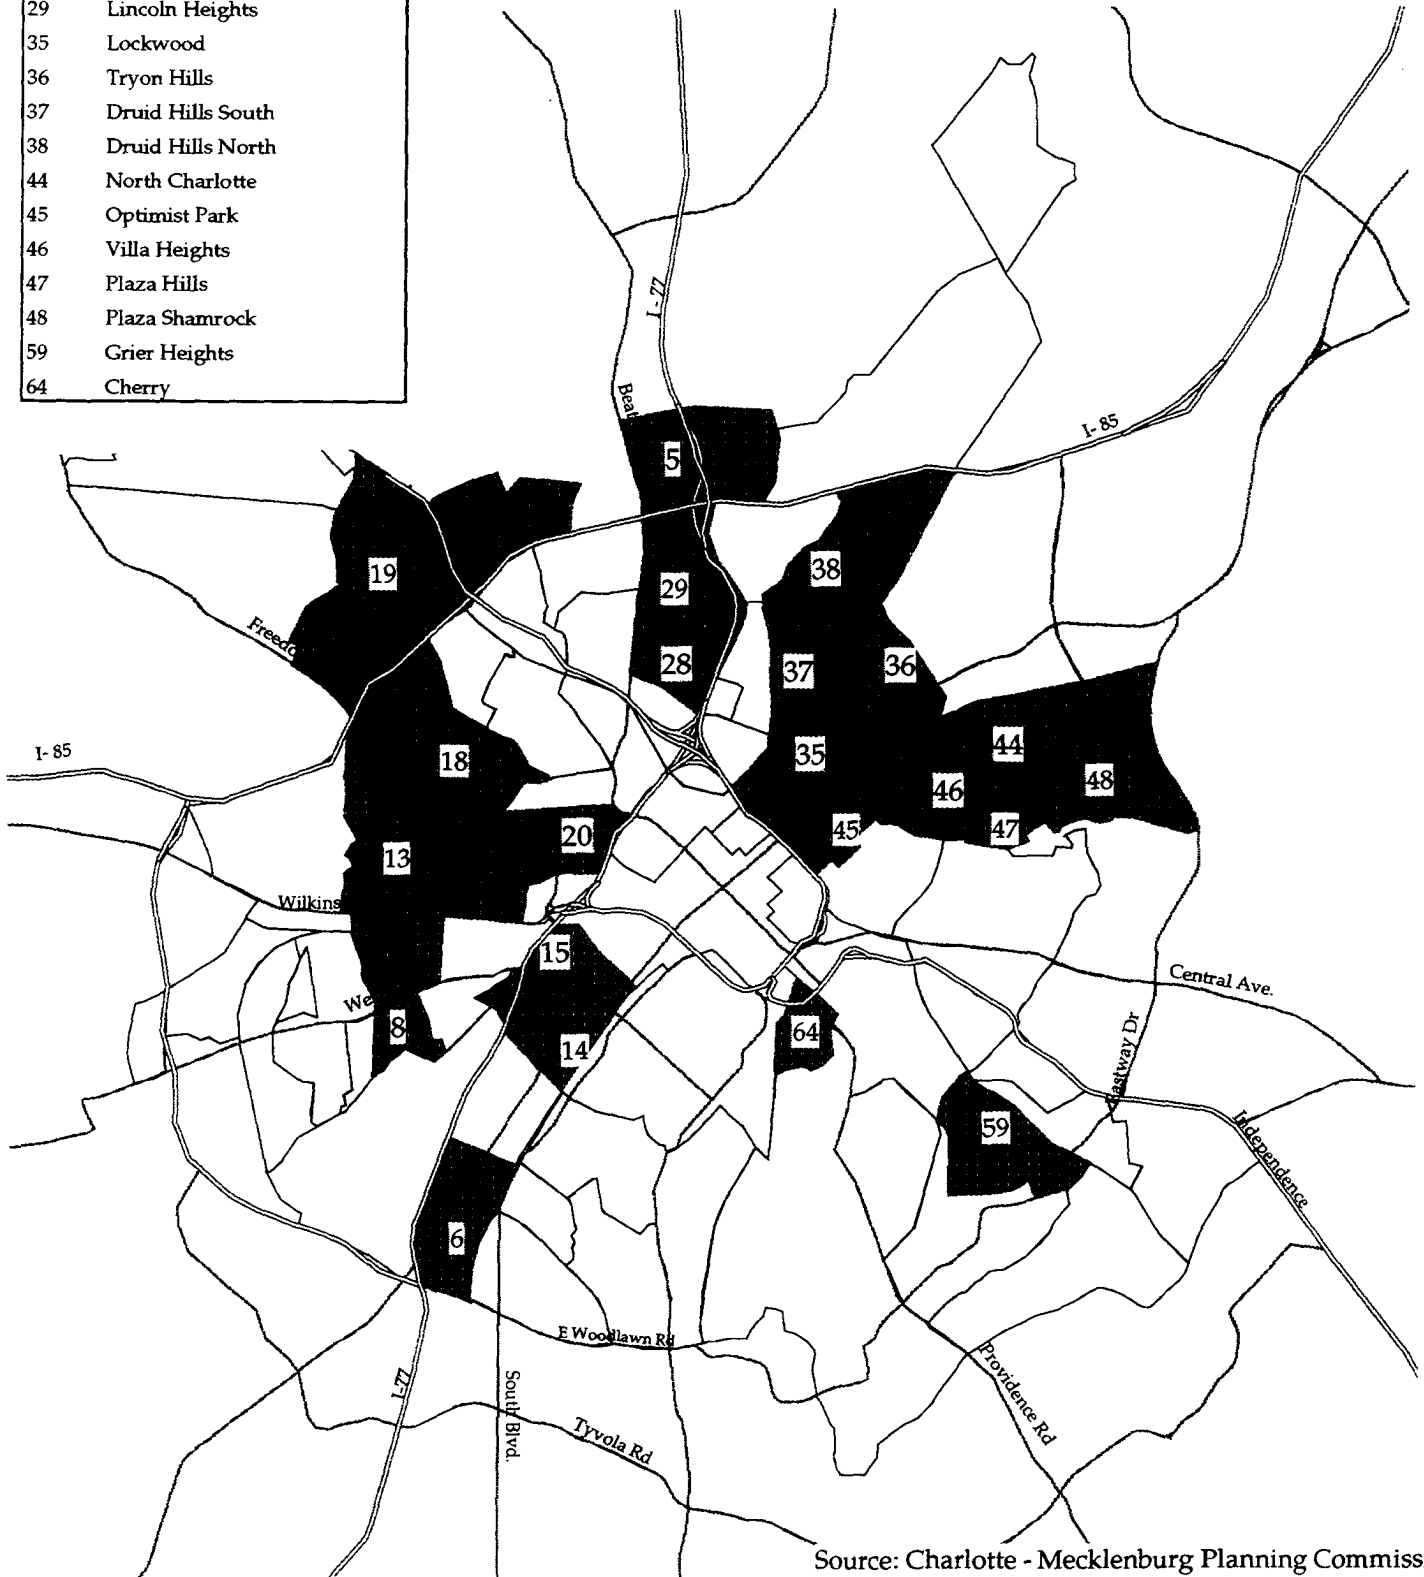

Recreation, day care/after school care, and tutoring were the most frequently cited children services identified by neighborhood leaders from these neighborhoods

Eight of the neighborhoods (Grier Heights, Oaklawn Park, Optimist Park, Villa Heights, Lincoln Heights, Wilmore, Wesley Heights and Lockwood) score among the top twenty for violent or drug offenses

STABLE NEIGHBORHOODS:

As shown on Map 5 and Table 3., thirty neighborhoods are classified as stable. Generally, stable neighborhoods are those that have very little social or physical needs. Although not as significant as the fragile or threatened neighborhoods, a few of the stable neighborhoods show average needs on both the social and infrastructure indicators. However, for most of these neighborhoods, their socioeconomic make-up is generally the same as the City.

**Stable Neighborhoods
Table 3.**

Neigh. Id.	Neighborhood	Social	Infra*	Comm*	Total	Category Ranking

32	Fourth Ward	0	0	0	0	Stable
63	Myers Park	0	0	0	0	Stable
43	University	0	0	0	0	Stable

* - Infra means Infrastructure; Comm means Community Appearance

** - Due to the area that was included to define the boundaries of Rockwell/Hemphill Heights the needs of two predominantly black neighborhoods known as Rockwell Park and Hemphill Heights may be understated

Of the thirty stable neighborhoods:

Most are located in the southern and eastern part of CWAC

Most score low on both social and physical needs

Only eight-Rockwell/Hemphill Heights (9%), Third Ward (9), Sugar Creek (7%), Westerly Hills (7%), Elizabeth (6%), Biddleville (6%), Wendover (5%), and Briar Creek (5%) have unemployment rates above 4%

Socioeconomic statistics for these neighborhoods generally mirror the City's statistics

Most of the housing in these neighborhoods are owner occupied

Only five neighborhoods (Third Ward, Plaza-Midwood, Biddleville, Commonwealth, and University Park) are among the top twenty neighborhoods for violent crime or drug offenses

Twenty-six of the neighborhoods have an organized neighborhood organization registered with the Planning Commission

Police, fix homes, and sidewalks were the most frequently cited services and type of assistance identified by neighborhood leaders from these neighborhoods

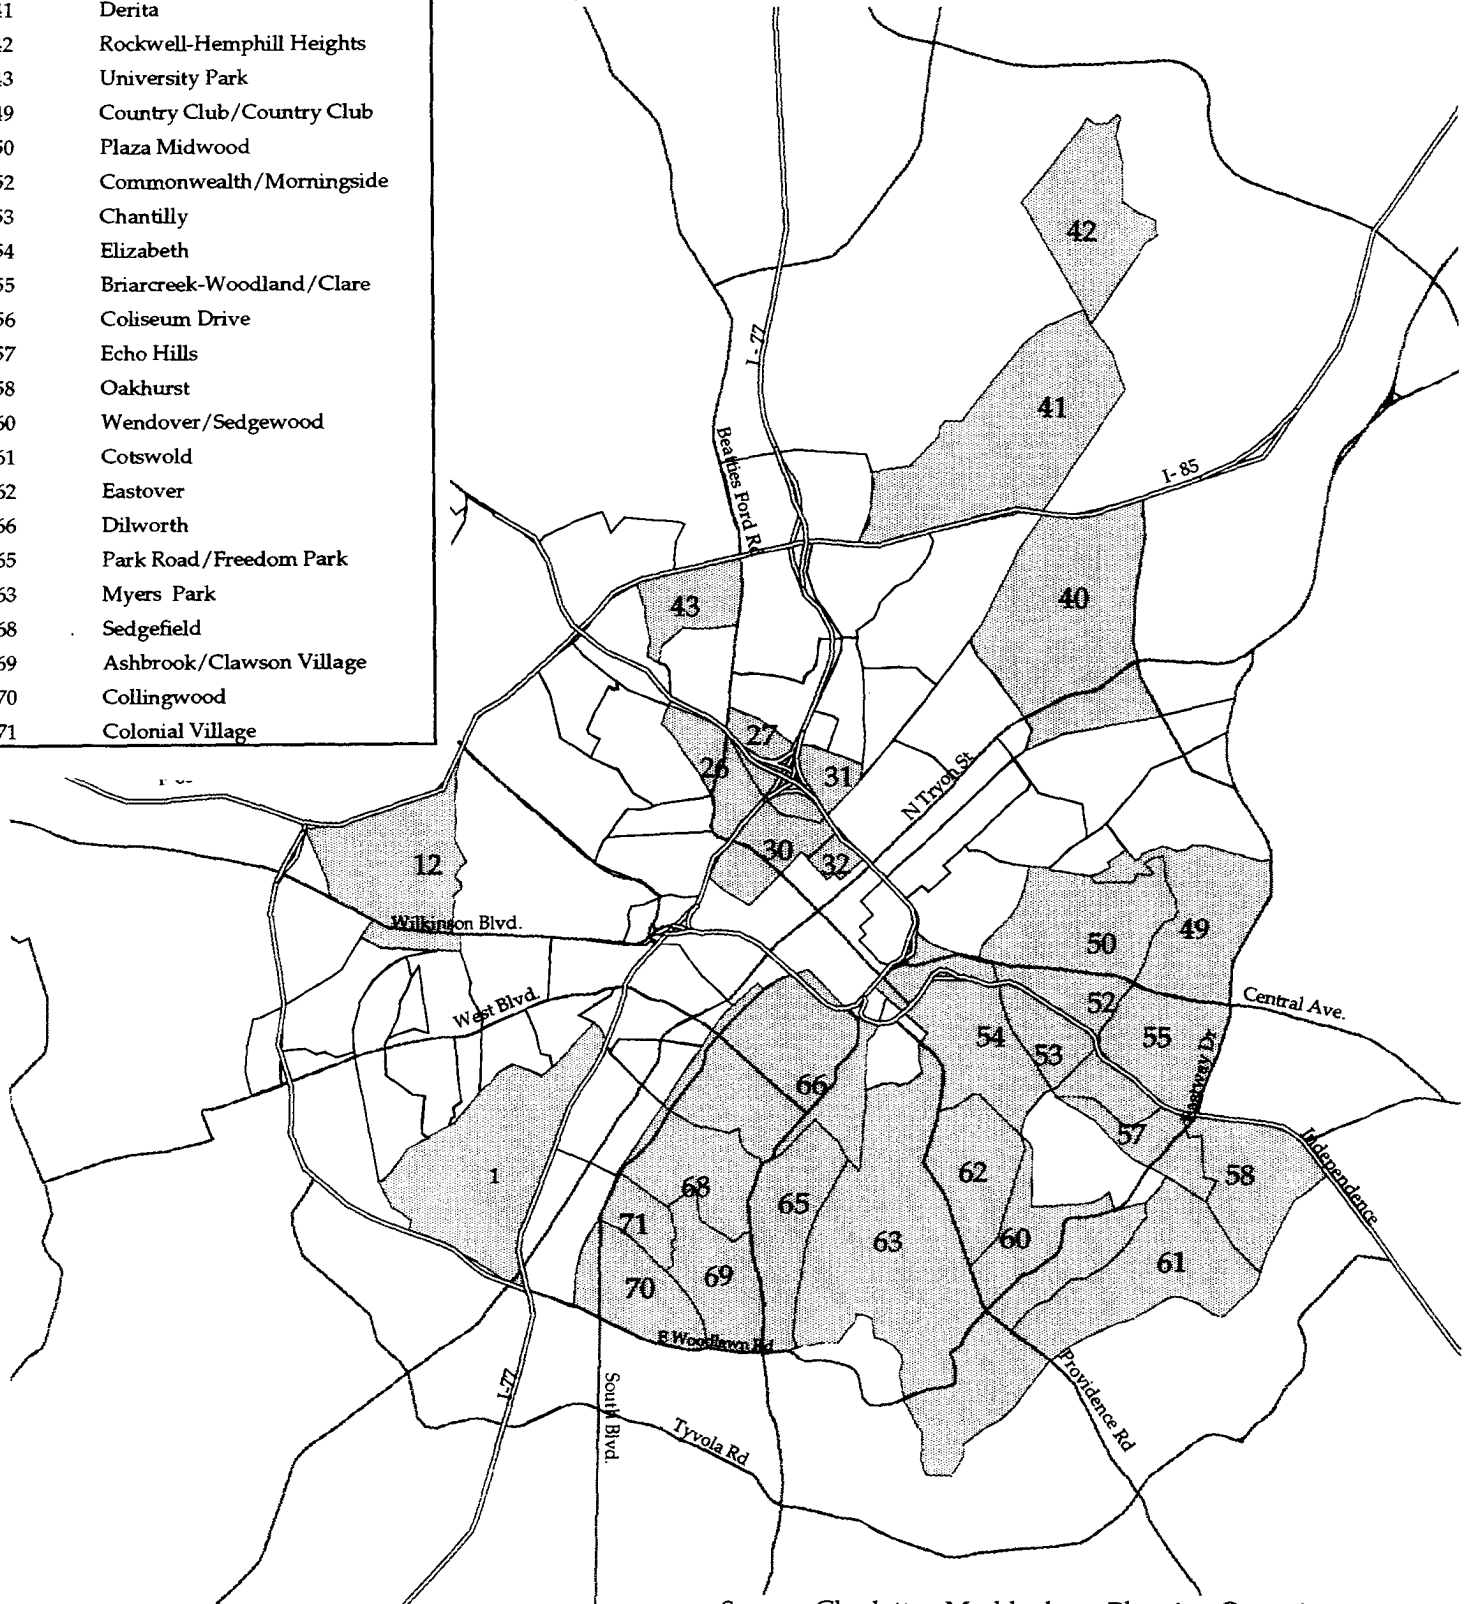

Tutoring, recreation and daycare/after school care were the most frequently cited children services identified by neighborhood leaders from these neighborhoods

Neighborhood Profiles

CITY WITHIN A CITY NEIGHBORHOOD PROFILES

This section profiles social and physical characteristics of each of the 73 City Within A City neighborhoods. The neighborhoods are grouped by their neighborhood classification (fragile, threatened, and stable) and listed in alphabetical order.

The first page of the neighborhood profile lists key social characteristics- population, household type, crime, education, employment, and income. The data is reported by both a numeric and percentage total for each item of information. The City's percentage total is also given for each item. Information on the City is reported to provide a benchmark or reference point to judge or gauge how similar or different conditions are in the neighborhood than the rest of the City. Also at the top of the first page is a map defining the neighborhood's boundaries.

The second page lists key physical characteristics- land use, housing, infrastructure, community appearance and community facilities. Information on city resources invested, neighborhood organizations and results of the neighborhood questionnaire are also listed on this page.

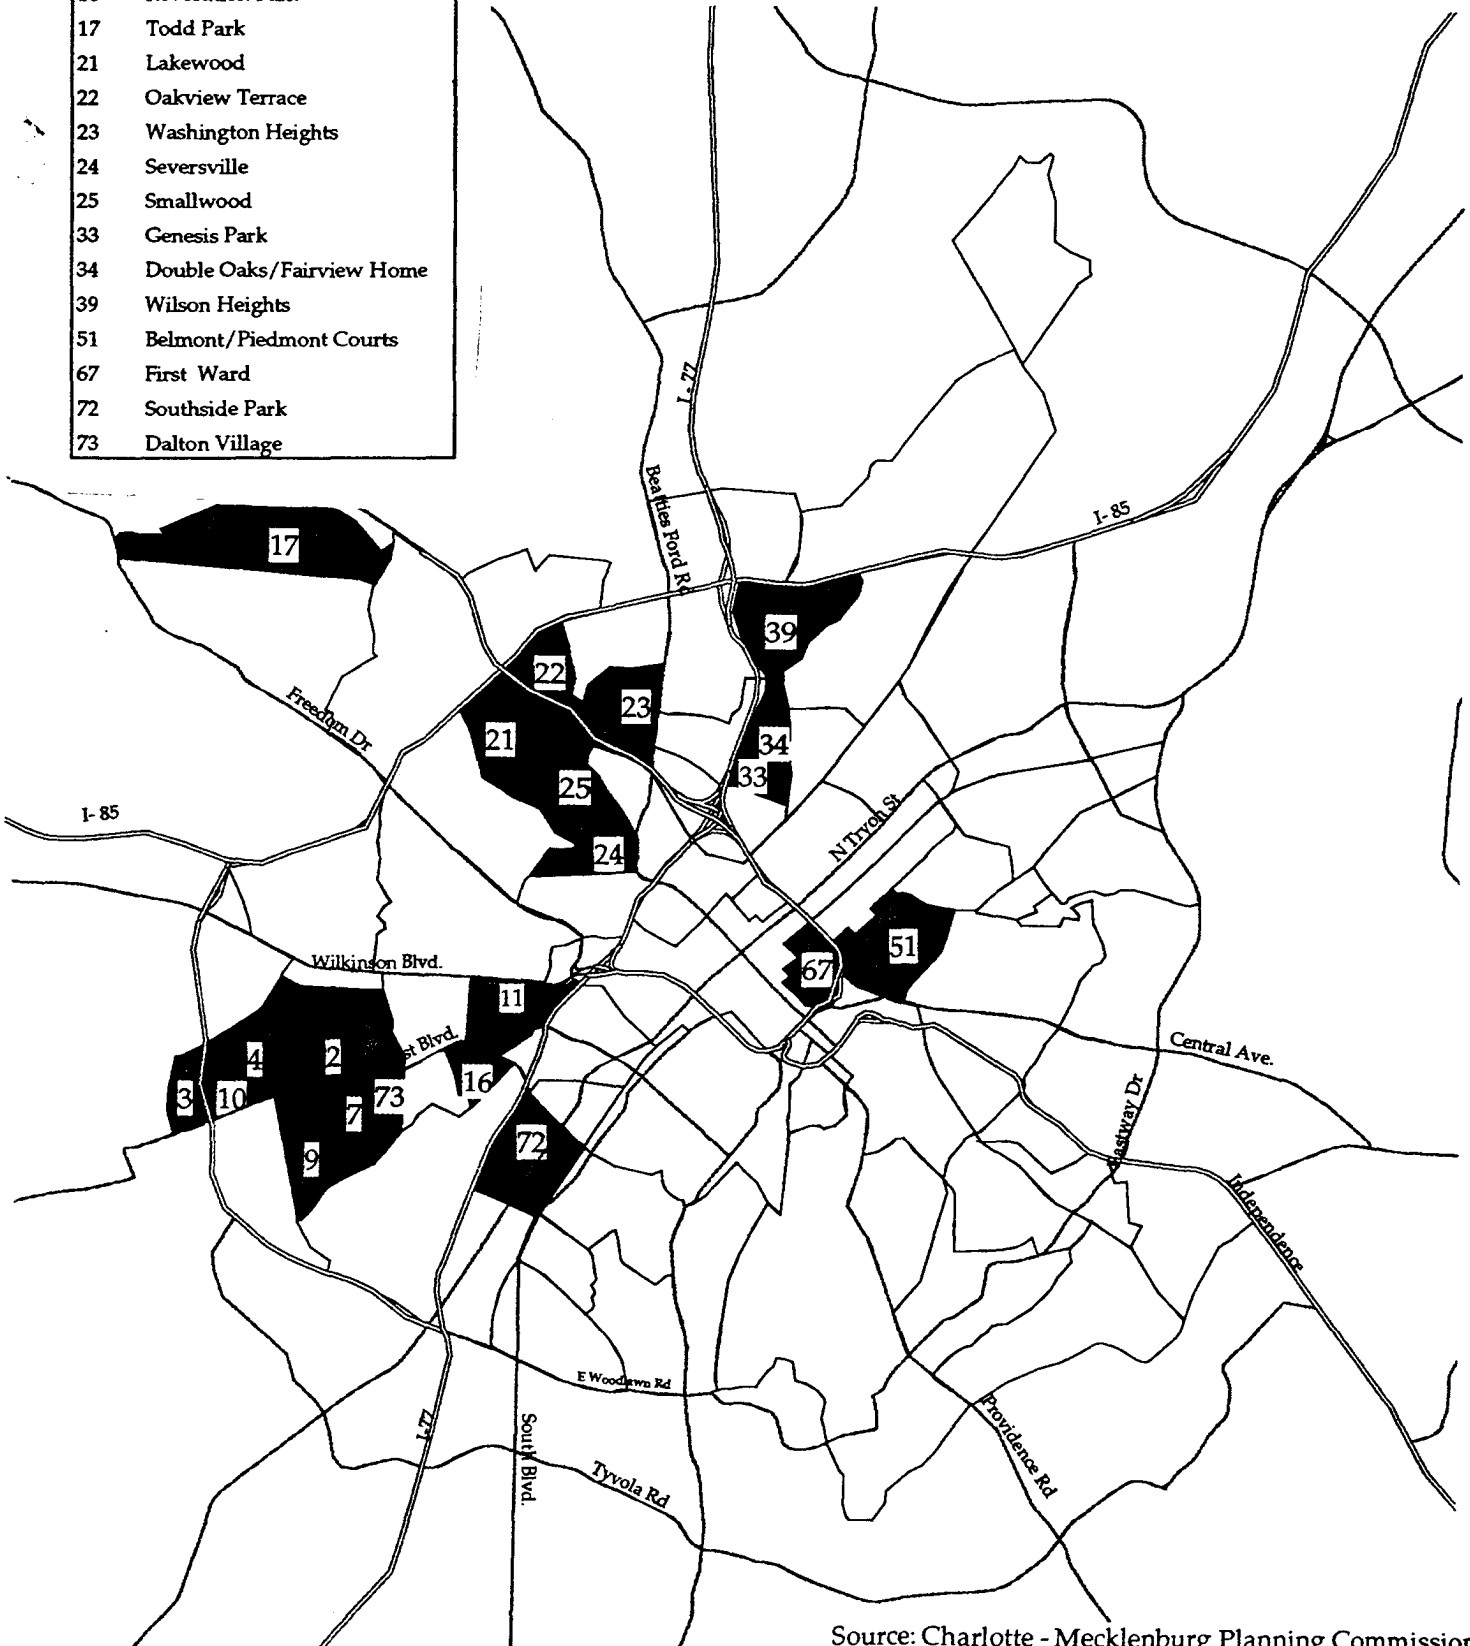

Definitions, explanations, and sources of data are listed in the appendix of this report.

Appendix

APPENDIX

DEFINITIONS, EXPLANATIONS AND SOURCES

SOCIOECONOMIC PROFILE

The data in the section of the report was taken from the 1990 Census of Population and Housing and the 1990 Census of General Social and Economic Characteristics.

POPULATION

Total Population- The total number of people living in a neighborhood.

Black Population- Total number of persons who are Negro, African American, Afro-American, Black Puerto Rican, Jamaican, Nigerian, West Indian, or Haitian living in a neighborhood.

Children under 18- Includes the total number of children living in a neighborhood who are seventeen years old or younger.

Elderly, 65 & Over- Total number of people living in a neighborhood who are 65 years old and older.

HOUSEHOLDS

Total Households- Total number of households in the neighborhood. A household includes all persons who occupy a housing unit. A housing unit is a house, an apartment, a mobile home, a group of rooms, or a single room that is occupied as separate living quarters. **Because this is complete count data, the total household count is different from the number given for total households under the income category.**

One Person Head- Total number of households in the neighborhood in which only one person is designated as the head of the household. This person could be male or female.

Married With Children- Total number of households where the man and woman live together, are legally married and their children live in the same house with them.

Female Head With Children- Total number of households in a neighborhood that are headed by a female with children and they live in the same house. There is no husband or adult male living in the house.

Households With No Vehicle- Total number of households in a neighborhood where no passenger car, van, truck or other vehicle is kept at home and available for use by household members.

CRIME

This information was provided by the Charlotte Mecklenburg Police Department. For various reasons, (such as the boundaries of the neighborhood being too small), crime data for each neighborhood could not be compiled. The Police Department combined some areas and crime statistics were reported for the combined areas. In these cases, Planning staff assigned the same data to each neighborhood to have crime statistics for each neighborhood. This was done for the following neighborhoods:

Jackson Park, Capitol Drive, Ponderosa/Wilmon, Boulevard Homes, Pinecrest, Reid Park, West Boulevard, Dalton Village, Wilmore and Revolution Park. Crime statistics for each of these neighborhoods are somewhat exaggerated.

Total Offenses- Total number of illegal acts or offenses committed in a neighborhood.

Drug Arrests- Total number of arrests made in a neighborhood that were drug related i. e. trafficking, purchasing or using.

Violent Offenses- Total number of violent acts (homicides, rapes, robberies/armed and strong armed, and aggravated assaults)

committed in a neighborhood.

Rate Per Thousand- The rate or frequency of occurrences of a particular type of crime for every 1,000 residents that live in a neighborhood. For example, a neighborhood's crime rate per 1,000 for drug arrests is 7.11. This means that for every 1,000 residents in the neighborhood there were approximately 7 arrests made.

EDUCATION

Adults, 25 and Over- The total number of adults that are at least 25 years old or older that live in a neighborhood.

High School Graduates- The total number of persons in the neighborhood who received either a high school diploma or the equivalent, for example passed the General Educational Development (G. E. D.), and did not attend college.

College Graduates- The total number of persons in the area that attended college and received some type of formal college level degree.

OCCUPATIONS

Adults in Labor Force- Total number of adults (persons 18 years or older) in a neighborhood in the labor force. Labor force includes all persons classified as employed or unemployed plus members of the U.S. Armed Forces.

White Collar Jobs- Includes the total number of persons employed in managerial, professional, technical, sales and administrative work.

Blue Collar Jobs- Includes the total number of persons employed in services, production, transportation, laborers, and household (domestic) work.

Unemployed- Includes total persons 16 years old and over who are currently not working and/or are available to accept a job.

Income

Total Households- An estimated number of households in the neighborhood. The total household number for this category of information is estimated based upon a sample number of households that were interviewed by the census bureau. **This count is different from the complete count figure given in the household section on the first page of the neighborhood profile.** This section also includes a count of the households with incomes within various income ranges. Household income includes the income of everyone in the household 15 years old or over whether related or unrelated.

Families Below Poverty- Includes the total number of families in a neighborhood with incomes below the poverty level as determined by the U. S. Census Bureau. The average poverty threshold for a family of four persons was \$12,674 in 1989.

Households On Public Assistance- Includes the number of households receiving public assistance. Public assistance income includes (1) supplementary security income payments made by the Federal or State welfare agencies to low income persons who are aged (65 years old or older), blind or disabled; (2) aid to families with dependent children, and (3) general assistance. Separate payments received for hospital or other medical care (vendor payments) are excluded from this item.

Female Households Below Poverty- Total number of households in the neighborhood headed by a single female where the household income is below the poverty threshold.

PHYSICAL PROFILE/COMMUNITY RESOURCES

This information was obtained from a variety of sources. The land use data was taken from the County's Tax Assessor's Office Tax Files; Housing Characteristics from the 1990 Census; Community Appearance, Infrastructure, Community Facilities Community Resources Committed, Neighborhood Organizations and Neighborhood Questionnaires were taken from field surveys, information submitted by various departments or from neighborhood leaders.

LAND USE

Total Acreage- Includes the total amount of land or acreage in a neighborhood.

Single Family- Includes all land or acreage being used for a single dwelling unit.

Multi-Family- Includes all land or acreage used for one or more dwelling units.

Business- Includes all land or acreage used for retail trade and services.

Industrial- Includes all land or acreage used for wholesale trade and manufacturing.

Office- Includes all land or acreage used for finance, real estate, insurance, and professional services.

Vacant- Includes all undeveloped land or acreage.

Recreational- Includes all land or acreage used for a public park, open space, golf course, and/or land devoted to any other public or private recreational use.

Institutional- Includes all land or acreage used for governmental, religious, medical or other similar type uses.

Housing Characteristics

Total Units- Includes the total number of houses, apartments, mobile homes or trailers, group of rooms or a single room in the neighborhood. Both occupied and vacant housing units are included in the total.

Occupied Housing Units- Includes the total number of units in the neighborhood with a person or persons living in them.

Vacant Housing Units- Includes all unoccupied units in a neighborhood.

Owner-Occupied Housing Units- Includes all units in a neighborhood where the owner or co-owner lives in the units.

Renter-Occupied Housing Units- Includes all units in the neighborhood that are not owned by the person or persons living in the units.

Boarded-Up Units- Includes all units in the neighborhood that are vacant and the windows and doors are covered by wood, metal, or masonry to protect the interior and to prevent entry into the housing units.

Housing Value Less Than \$50,000- Includes the total number of housing units in which the total value of the structure is estimated to be less than \$50,000.

COMMUNITY APPEARANCE

Vacant/Overgrown Lots- Includes the total number of undeveloped lots in a neighborhood that are overgrown as determined by City ordinance.

Repeat Violations- Includes total number of properties in a neighborhood that have been cited more than once for litter, trash, junk cars or other related violation.

Street Cleanliness Rating- Includes an overall assessment of how litter free the streets are in a neighborhood. The ratings are as follows: Excellent, Good and Poor.

Excellent- No litter in the streets.

Good- Only a moderate amount of litter in the streets.

Poor- Heavy litter accumulation in the streets.

Abandoned/Junked Cars- Includes the total number of junked cars parked along the streets or in yards that are inoperable.

Bulk Item Pick-Ups- Includes the total number of times large bulk items have been picked up in a neighborhood.

Number of Litter Violations- Includes the number of properties in a neighborhood that have been cited specifically for some type of litter violation.

Inadequate Trash Containers- Includes the number of properties or residences that don't have the proper trash receptacle or container to dispose of trash and garbage.

INFRASTRUCTURE

Total Streets- Includes an estimated total number of streets in a neighborhood.

Storm Drainage Rating- Includes an overall assessment or ranking of storm drainage facilities in a neighborhood. The drainage ratings are based on need. A neighborhood could receive a rating of high, medium or low.

High Priority- Storm water runoff is causing excessive ponding of water. This ponding of water is occurring in the street and yard spaces of residential properties. In some cases, ponding has made the streets impassable during times of heavy rain. Severe erosion is occurring within the open drainage ways, and the area lacks an adequate drainage system or no system at all. Possible flooding of residential structures is also occurring.

Medium Priority- Stormwater runoff creates ponding of water in the street and in the yards. The ponding that is occurring does not make the streets impassable, nor are any residential structures in danger of flooding. Erosion of the drainage way is evident. The drainage systems within the street right-of-way generally are nonexistent in the majority of the area, or those systems are in place are of inadequate size to handle the storm water runoff.

Low Priority- Some ponding of storm water runoff is occurring. There exists mainly a need for curb and gutter along the streets to channel the runoff into adequate drainage systems. Small amounts of erosion is occurring and there is no flooding of structures.

Streets Without Sidewalks- Includes the percentage of streets in the neighborhood that don't have sidewalks.

Streets Without Curbs and Gutters- Includes the total number of streets in the neighborhood where no curb or gutter is present.

COMMUNITY FACILITIES

This information consists of an inventory of the number of public and private facilities such as schools, libraries, fire departments etc. School facilities were counted if they were actively being used for a school or an administrative use.

COMMUNITY RESOURCES COMMITTED/TARGETED

Adopted Area Plan- Includes all land use plans that have been prepared by the Planning Commission and adopted by the City Council for a neighborhood.

Neighborhood Reinvestment- City program specifically designated for neighborhoods within Route 4. These funds are principally used for infrastructure improvements (i.e. streets, sidewalks, curbs, gutters, and storm drainage).

Innovative Housing Fund- City program used to fund various housing projects. This money is usually used to leverage private sector investments to develop affordable housing for low and moderate income people. The monies are administered by the Community Development Division of Neighborhood Development Key Business.

Area Plan Funds- Fund established to help implement adopted area plans. The funds are administered by the Planning Commission and used to pay for physical improvements identified in area plans.

Neighborhood Investment- Program for selected neighborhoods to fund minor beautification projects like community gardens, landscaping projects and others. This program is administered by the Community Improvement Division of Solid Waste Key Business.

NEIGHBORHOOD ORGANIZATIONS

Total Organizations- Includes all organized associations or groups in a neighborhood that are registered with the Planning Commission.

Neighborhood Organizations- Includes total number of tenant or homeowner organizations in the neighborhood registered with the Planning Commission.

Community Development Corporation- Includes total number of legally incorporated organizations that have 501 (C3) tax status and includes CDC in the name of the organization.

Merchant Association- Includes total number of business organizations in the neighborhood or that serve the neighborhood.

Other Organizations- Includes other organizations that a neighborhood may be a part of such as the Villa Heights/Belmont/Optimist Park Coalition.

NEIGHBORHOOD QUESTIONNAIRE

The information contained in this section are the results of a questionnaire sent to neighborhood leaders. Leaders were asked to respond to priority service needs and assistance needed in their neighborhoods. A copy of the complete questionnaire appears on the next several pages.

If you do not have time to answer the questionnaire, please forward it to another officer in your association and/or resident that would be willing to fill out the questionnaire.

NEIGHBORHOOD LEADERS
QUESTIONNAIRE

YOUR NAME _____

YOUR ADDRESS _____

NAME OF ORGANIZATION/ASSOCIATION _____

YOUR TELEPHONE NUMBER _____

ARE YOU AN OFFICER? YES _____ NO _____

IF YES, CHECK OR NAME YOUR POSITION?

PRESIDENT _____ OTHER _____

VICE PRESIDENT _____

SECRETARY _____

TREASURER _____

IF NO, PLEASE GIVE THE NAME AND ADDRESS OF THE PRESIDENT OF YOUR ORGANIZATION.

NAME _____

ADDRESS _____

QUESTIONS:

- 1) In the final report that will document the survey work, we want to include a quote from each neighborhood leader that describes their neighborhood. In the space below, please describe existing conditions and/or the hopes for the future of your neighborhood in one or two sentences.

Do we have your permission to use this quote in the report?

Yes _____ No _____

Do we have your permission to use your name with this quote in the report?

Yes _____ No _____

2) Which of the following programs or services do you think are needed in your neighborhood? (Please rank them in order of importance, 1 being the most important).

- Jobs _____
- Job training _____
- Fix up homes _____
- Build new homes _____
- Advice or treatment for drug and/or alcohol problems _____
- Fix or build sidewalks _____
- Grants or loans for residents to start businesses _____
- Technical assistance for residents starting businesses _____
- Grants or loans for residents to do projects in the neighborhood _____
- Increase police patrol _____
- Recreation for adults _____
- Increase bus service _____
- Care for elderly adults _____
- Adult education classes _____
- Provide more places to shop for groceries, clothes, etc. _____
- Install or replace streetlights _____
- Healthcare/medical assistance _____
- Other _____

3) What types of services/programs are needed for children in your neighborhood? (Please rank in order of importance, 1 being the most important).

- Recreation for children _____
- Prevention of teenage pregnancy _____
- Tutoring _____
- Big Brother/Big Sister _____
- Boy Scouts/Girl Scouts _____
- Job Training/Jobs _____
- Advice or treatment for drug and/or alcohol problems _____
- Day Care _____
- After School Care _____
- Other _____

- 4) Is your neighborhood association currently working alone or with a church, civic organization, the City, County, or other type of organization to address problems in your neighborhood?
Yes _____ No _____

If yes, please list the organization(s).

- 5) Would your group be interested in working with a church or other organization to help address problems in your neighborhood?
Yes _____ No _____

If yes, what type(s) of assistance do you need? (Please check)

- Organizing neighborhood/creating a neighborhood association _____
- Training for neighborhood association board of directors _____
- Legal assistance _____
- Financial assistance _____
- Organizing a neighborhood clean-up _____
- Starting a community/crime watch program _____
- Creating a community gardening program _____
- Making repairs to homes _____

Please list other types of assistance needed

Would your group be interested in assisting another neighborhood association or organization to address problems in their neighborhood?

Yes _____ No _____

If so, what type of assistance could you provide? (Please check)

- Organizing neighborhood/creating a neighborhood association _____
- Training for neighborhood association board of directors _____
- Legal assistance _____
- Financial assistance _____
- Organizing a neighborhood clean-up _____
- Starting a community/crime watch program _____
- Creating a community gardening program _____
- Making repairs to homes _____

Please list other types of assistance your organization could provide.
