NOTE: Clearances are reported in accordance with Uniform Crime Report guidelines. Since clearances are not counted until they are entered until they are entered into the Records system, any delays in processing may result in some clearances being reported in succeeding months. The significant increase in clearances in Nov., 2003, was the result of the entry of clearances from 2002 and 2003 that were processed in the Case Management system but were not entered in the mainframe Records system until that month.

Clearance rates for crime reporting are calculated by dividing the number of crimes cleared during a designated time span by the number of crimes reported in the same period and converting the result to a percentage (mutiplying by 100). Since cases from previous reporting periods can be cleared during the designated time span, the rate may be higher than 100%.

(Citations issued through the "Safe Speed" prog	ram are not included in the CMPD
citation totals used in the summary chart above	e or in the other citation charts.)

Traffic Collison Reports Charlotte-Mecklenburg Police Department Year-to-Date: 2003-2004 (Through December)

<u>Type</u>	<u>2003</u>	2004	% Change
Fatal Collisions Vehicle Occupants Killed Pedestrians Killed	54 50 8	37 33 6	-31.5% -34.0% -25.0%
Personal Injury Collisions	7438	6886	-7.6%
Property Damage Collisions	22114	21123	-4.5%
Total Collisions	29606	28046	-5.3%

^{*} The number of fatal collisions and the number of persons killed (fatalities) in those incidents is taken from the HITS file. Their records are updated for deaths that occur after the initial report is filed.

Uniform Crime Reporting Procedures:

The Charlotte-Mecklenburg Police Department reports offense and arrest statistics in accordance with standard Uniform Crime Reporting (UCR) guidelines. UCR policy states that any adjustments to previous months can be made on the current month's report:

...In tabulating crime counts, an agency may find that offense totals for past months require adjustments due to developments in the investigation or other handling of the matter. It may be necessary to adjust totals reported to UCR for the past month or prior months. Needed adjustments can be made on the current month's report and do not affect the reliability of the figures in that such adjustments tend to equalize each other from month to month over a period of time.

- Uniform Crime Reporting Handbook, FBI, 1984, p. 42-43

We are required to report crime monthly to the UCR program, and we do therefore make an effort to process monthly changes in a timely manner. However, occasionally due to the review and processing required for reclassifying, unfounding or clearing cases, the current month's totals may reflect the processing of a backlog of these changes from previous months.

Users of the data are cautioned that conclusions about substantial changes in crime trends or in clearance rates based on only a single month's data or trend may reflect some of these adjustments. For this reason, in addition to the monthly and year-to-date trends on Page 1, the monthly report routinely includes a comparison for the previous 12 months (p. 4), as well as graphs that provide seasonal/monthly comparisons over a five-year period (p. 5-8).

This report was compiled by the Research, Planning, and Analysis Division.

We make an effort to present the most accurate information available <u>at the time this report is published</u>. Please notify the Research, Planning, and Analysis office if you have any questions about the data in this report or about an error that was missed in proofing the report.

The division names adopted in 2003 are used in this report. For ease of use, they also include the old district designations in parentheses.
