APPENDIX	37

ILLUSTRATIONS

Figure	Page
1. Approximate range of the Southern Appalachian gold fields	3
2. Mining districts within the Southern Appalachian gold fields	3
3. Geologic Map of Mecklenburg County, North Carolina	6
4. A list of 57 mines and their locations in Mecklenburg County	7
5. Map of downtown area, Charlotte, North Carolina, showing the location of the Rudisill, St. Catherine and Brush Hill mines	9
6. Map showing location of weathered rock exposures in the area of the St. Catherine mine	10
7. Geologic map of the Rudisill mine area showing the approximate boundaries of the Rudisill lode zone	12
8. Geologic map of the St. Catherine mine area showing the approximate boundaries of the Rudisill lode zone	13
9. Underground workings of the "Rudisill" gold mine 1854.	14
10. A reduced tracing of a map of the 350 foot level workings of the Rudisill mine drawn by T. Fred Challis in 1934.	16
11. Longitudinal vertical section of the Rudisill mine, Charlotte, North Carolina	19
12. Longitudinal vertical section of the St. Catherine mine, Charlotte, North Carolina.	20
13. Location and extent of known mine workings in the area of the Rudisill - Brush Hill mines.	21
14. Location and extent of known mine workings in the area of the St. Catherine mine.	22
15. A longitudinal vertical section showing underground workings of the Brush Hill and Rudisill mines, 1860.	26
16. Alteration of the original ground surface in the area of the Rudisill - Brush Hill mines.	31
17. Alteration of the original ground surface in the area of the St. Catherine mine.	32
