Water and Sewer Policies, Procedures, Standards and Specifications

5100 Brookshire Boulevard
Charlotte, North Carolina 28216

PUBLICATION DATE: DECEMBER 29, 1993

July 27, 1995

This page intentionally left blank.

IMPORTANT NOTICE

This document was created and assembled for use in planning, designing, and constructing water and sanitary sewer facilities which will be owned and operated by the Charlotte-Mecklenburg Utility Department. It is not intended nor should it be used for any other purpose.

Particular attention should be given to requirements of the North Carolina Department of Environment, Health, and Natural Resources as they relate to this document. CMUD has been granted variances from NCDEHNR regulations in instances where justification for the variance was well documented. This document includes the variances but does not specifically indicate where a variance has been made. These variances are based on local conditions, historical data, and in some cases, specialized equipment which CMUD owns and operates to maintain facilities. These variances are not necessarily appropriate for other situations or other jurisdictions.

TABLE OF CONTENTS

I. Introduction

- A. Purpose
- B. CMUD System
- C. CMUD Facilities
- D. CMUD Organization
- E. Utility Contact List
- F. Important Telephone Numbers

II. System Planning

- A. Ten Year Needs Assessment
- B. Five Year Capital Improvements Program

III. CMUD Extension Policy

- A. Purpose
- B. Facilities Provided by CMUD
- C. Extension of Service Required by Annexation
- D. Programs for Extension of Service
- E. Service Connections
- F. Letter of Credit for Reimbursable Program Financing
- G. Initiation/Utilization of Extension Programs
- H. Wastewater Lift Stations
- I. Other Considerations
- J. Definitions

IV. Design of Sanitary Sewers

- A. Hydraulic Design
- B. Route Selection
- C. Survey Requirements
- D. Rights-of-Way And Construction Easements
- E. Sewer Location, Spacing and Venting
- F. Conflicts With Existing And Proposed Utilities
- G. Depth And Structural Design
- H. Stream Crossings
- I. Inverted Siphon Design
- J. Protection Of Water Supplies
- K. Corrosion Protection
- L. Design of Erosion And Sediment Control Measures
- M. Bores And Tunnels
- N. Sequential Procedure For Design Of Sewer

V. Design Of Water Mains

- A. Fire Flow And Residual Pressure Requirements
- B. Hydraulic Design
- C. Survey Requirements
- D. Location And Depth
- E. Pipe Materials and Thickness Design
- F. Thrust Restraint
- G. Valve Location Requirements
- H. Fire Hydrant Spacing
- I. Provisions For Testing And Disinfection
- J. Air Relief Valves And Blowoffs
- K. Minimum Pipe Size And Limitations On Use Of Small Diameter Mains
- L. Conflicts With Existing And Proposed Utilities
- M. Bores And Tunnels
- N. Stream Crossings
- O. Design Of Erosion And Sediment Control Measures

VI. Survey Standards

- A. General
- B. Preliminary
- C. Sanitary Sewer Outfall & Trunk Lines
- D. Sanitary Sewer Street Extensions
- E. 16" and Larger Water Mains
- F. Water Mains Less Than 16"
- G. Construction Stakeout - Sanitary Sewer
- H. Construction Stakeout - Water Mains

VII. Drafting Standards

VIII. Traffic Control Plans

IX. Permits And Encroachments

- A. Highway Encroachments
- B. Railroad Encroachments
- C. DHS/DEM Permits
- D. Erosion Control Permits
- E. Storm Water Permits
- F. Blasting Permits
- G. Pavement Cutting Permits
- H. Burning Permits
- I. Wetlands Permits
- J. Tree Removal Permits

X. *Engineer's Checklist for Water And Sewer Plans*

- A. Title Sheet
- B. General
- C. Water Plans
- D. Sewer Plans
- E. Contract Maps
- F. As-Built Checklist
- G. Activation/Project Final Checklist

XI. *Environmental Assessments*

XII. *Wetlands Permits*

XIII. *Cross Connection/Backflow Prevention*

- A. Introduction
- B. Definitions
- C. Installation Specifications
- D. Construction Guidelines
- E. Approved Assemblies and Material Specifications
- F. Testing Requirements
- G. Certified Tester Requirements
- H. Test Kits
- I. Approved Testing Equipment
- J. Approved Testers Schools
- K. Standard Details

XIV. *Standard Water Specifications And Details*

Material Specifications

- A. Pipe
- B. Fittings
- C. Fire Hydrants
- D. Valves
- E. Water Main Taps
- F. Sleeves/Clamps
- G. Residential Water Services
- H. Large Water Services
- I. Ferrous Castings
- J. Miscellaneous Steel
- K. Concrete
- L. Stone and Brick
- M. Traffic Control Devices
- N. Erosion Control

Detailed Specifications

- A. Handling and Storage of Materials
- B. Connection to Existing Mains
- C. Existing Utilities
- D. Water/Sewer Clearance
- E. Excavation
- F. Pipe-Laying
- G. Installation and Assembly
- H. Installing Valves, Hydrants, and Fittings
- I. Water Main Taps
- J. Backfill
- K. Compaction
- L. Removal and Restoration of Pavement
- M. Concrete
- N. Bores
- O. Guaranteed Casing
- P. Tunnels
- Q. Blasting
- R. Testing and Inspection
- S. Repairs
- T. Restoration
- U. NCDOT right-of-way

Standard Details

XV. Standard Sewer Specifications And Details

Material Specifications

- A. Pipe
- B. Manholes
- C. Miscellaneous Steel
- D. Concrete
- E. Stone and Brick
- F. Ferrous Castings
- G. Traffic Control Devices
- H. Erosion Control

Detailed Specifications

- A. Handling and Storage of Materials
- B. Connection to Existing Sewers
- C. Existing Utilities
- D. Sewer/Water Clearance
- E. Clearing
- F. Excavation
- G. Pipe-Laying

- H. Lateral Installation
- I. Backfill
- J. Compaction
- K. Manhole Construction
- L. Piers
- M. Removal and Restoration of Pavement
- N. Concrete Construction
- O. Bores
- P. Guaranteed Casing
- Q. Tunnels
- R. Blasting
- S. Testing and Inspection
- T. Repairs
- U. Abandonment
- V. Restoration
- W. NCDOT right-of-way

Standard Details

XVI. Environmental Protection

- A. Trees
- B. Air Pollution
- C. Noise Control
- D. Water Pollution
- E. Erosion and Siltation Control
- F. Standard Details

XVII. Wastewater Lift Stations And Force Mains

- A. Operational & Performance Standards
- B. General Provisions & Details
 - 1. Pump Stations
 - 2. Wetwell
 - 3. Valves
 - 4. Piping
 - 5. Structures
 - 6. Site
 - 7. Testing, Inspection, and Startup
- C. Electrical Specifications for Package Pump Stations
 - 1. General
 - 2. Materials and Methods
 - 3. Motors and Controls
 - 4. Electrical Power Equipment
 - 5. Lighting Fixtures
 - 6. Testing, Inspection, and Startup

D. Standard Details

XVIII. Low Pressure Sewers

- A. Design of Pressure Sewer Systems
- B. Material and Installation Specifications for Low Pressure Sewer
 - 1. Piping
 - 2. Fittings
 - 3. Valves
 - 4. Service Boxes and Lids
 - 5. Installation
- C. Standard Details

XIX. CMUD Methods And Materials Committee

- A. Purpose
- B. Composition And Procedures
- C. Criteria For Approval Of New Materials Or Construction Methods
